DCC Telecommunications

Company Profile

DCC is a leading Egyptian distributor of cutting-edge network infrastructure solutions, dedicated to delivering exceptional value and unparalleled support. With a focus on excellence, we offer a comprehensive range of high-quality products designed to meet the evolving demands of the digital era.

Founded back in 2002, DCC (formerly known as Digital Connection) primarily focusing on the voice and telecom industry, DCC have evolved through history to include all networking infrastructure including copper and Fiber cabling, Video Surveillance, Data Center and Racks solution.

At DCC, we provide
Reliable networks with endless possibilities

Our Mission

DCC is dedicated to provide exceptional value to our partners by offering a comprehensive portfolio of reliable network infrastructure products and services. Backed by unmatched support and expertise, we strive to drive digital innovation and transformation in the region.

Our Core Values

Customer Focus	**Integrity**
Partnerships	**Excellence**

DCC Services

Product Distribution

DCC prioritizes a high fulfillment rate as a cornerstone of our customer focus commitment. We achieve this by implementing robust inventory management protocols that ensure timely and accurate stock updates.

Our supply chain maintains strong relationships with suppliers to guarantee a consistent flow of products. Meanwhile, we optimize our ordering processes and workflows to minimize delays and errors. We ensure efficient picking and packing processes, we streamline operations and reduce fulfillment times. Our team is readily available to address any inquiries enhancing our fulfillment performance.

Just-in-time Inventory Management

Supply Chain Excellence

Optimized Order Processing

Responsive Customer Operations

Network Design

We focus on helping the system integrators reach the tailored network solutions that align with the clients' specific needs and business objectives. We review network architectures, specifications, plan for future growth, and provide our technical advices as well for better implementation.

By partnering with us, you can benefit from our expertise, and commitment to delivering tailored network solutions that align with your customer objectives.

> *By investing in a strategic network design, organizations can proactively address future challenges and capitalize on emerging technologies.*

Value Engineering

As our customer centric philosophy is about delivering what the customer's need within the required framework. We help our partners to optimize the network design to reduce costs while maintaining performance standards. We conduct thorough assessments and recommend the optimum solution with vendors preferences, ensuring to deliver the maximum value to our end users

Objective Evaluation

Design Assessment

Reliable Information

Training and Warranty

Encompass both knowledge transfer and customer support. We facilitate training programs on our products and best practices. These trainings ensure your technical team are well equipped to deliver both promised design and implementation to the end customer.

Additionally, with our international vendors we deliver warranty on end-to-end solutions guaranteeing long term channel performance on the provided network to ensure uninterrupted network operations

Technial team training

We help our system integrators to certify their technical team to design, implment and commission our products

Knowledge Seminars

Frequently we announce about seminars conducted by our vendors to shed the light about new products, new tools or new features

Vendor Warranty

with well designed network and trained installers we help our partners to deliver the promised warranties on end-to-end solutions to our end users

Copper Modules

Copper Patch Panels

Fiber Optics Solutions

Fiber optics revolutionizes connectivity by enabling high-speed, long-distance data transmission with unparalleled reliability. DCC recognizes the transformative power of fiber optics and provides a comprehensive suite of solutions serving diverse applications. From data centers, telecom, and enterprise networks to residential compounds.
DCC offers fiber optic solutions that empower businesses to harness the full potential of this cutting-edge technology.

Key Components
